4. Analysis Approach

Use the **Pulak Prasad framework** (from `skills/pulak-prasad-investing-from-darwin-en.md`) + **InvestSkill prompts** for each candidate:

```
[1] Kill List check → Any exclusion criteria triggered? → REJECT
[2] ROCE consistently >15%? (5+ years) → No? → REJECT
[3] Moat source clear and sustainable? → Unclear? → REJECT
[4] Management integrity + competence? → Doubt? → REJECT
[5] Valuation reasonable? → Too expensive? → WATCHLIST
[6] BUY. Then be very lazy.
```

Immediate Exclusions (likely Kill List failures for Chinese market):

- **SOEs** (Criterion #7): PetroChina, Sinopec, ICBC, ABC, Bank of China, China Mobile, China Unicom, China Telecom, China State Construction, CRRC, etc.
- **High leverage**: Banks (all), Insurance
- **Rapidly changing industry**: BOE Technology (display cycles), LONGi (solar oversupply)

Most Promising Candidates (likely to pass Kill List):

Code	Company	Why promising
600519	Kweichow Moutai	Ultimate moat, high ROCE, cash cow, minimal debt
000858	Wuliangye	Strong brand, high ROCE, consumer staple
000568	Luzhou Lao Jiao	Premium baijiu, high margins
600809	Shanxi Fen Wine	Premium baijiu, growing brand
300750	CATL	Global battery leader, but industry changing fast ()

Code	Company	Why promising
000333	Midea Group	Strong brand, diversified, high ROCE
300760	Mindray	Medical device leader, high ROCE, global expansion
600276	Jiangsu Hengrui	Innovative pharma, pipeline-driven
002475	Luxshare Precision	Apple supplier, but single-customer risk ()
300124	Shenzhen Inovance	Industrial automation, high ROCE

Next Steps

1. Create directories for top candidates: `mkdir 000858 000568 600809 000333 300760`
2. Download annual reports: `python3 skills/scripts/download_reports.py`
3. Run Kill List on each
4. Deep analysis on survivors using InvestSkill frameworks
